OVERVIEW: Methodology and key supply findings

A Net Zero Transition Plan for the UK Food System

David Kennedy, Partner: Corporate Sustainability, EY

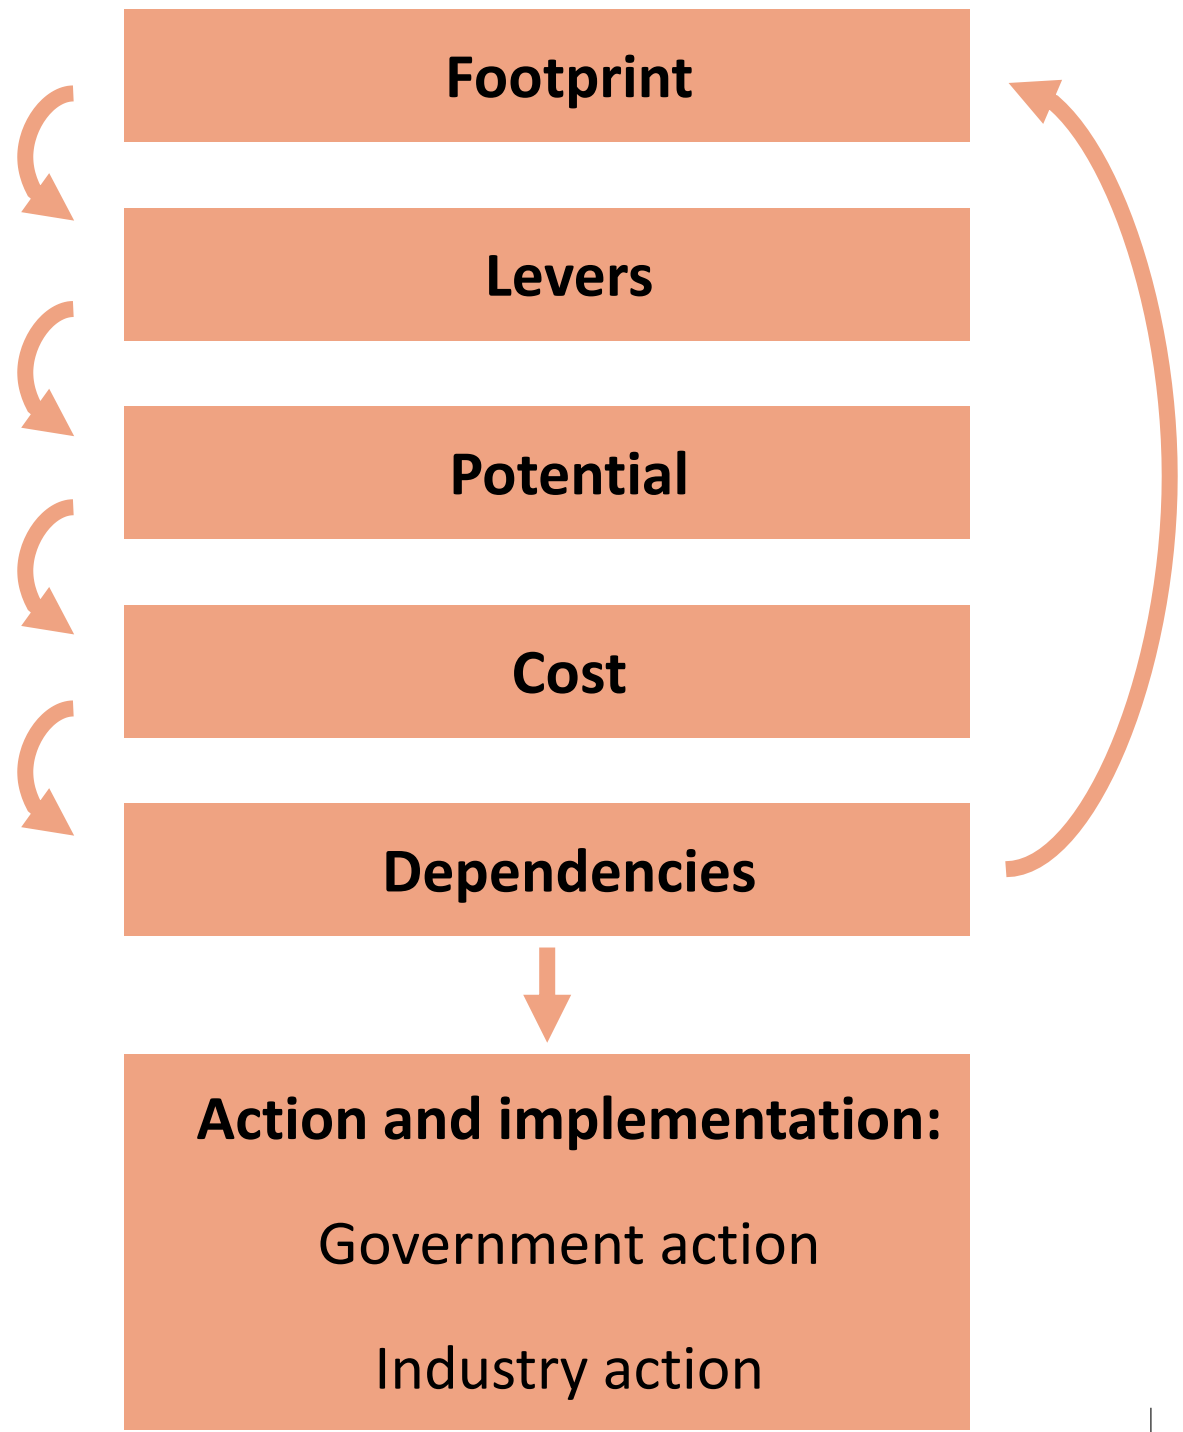

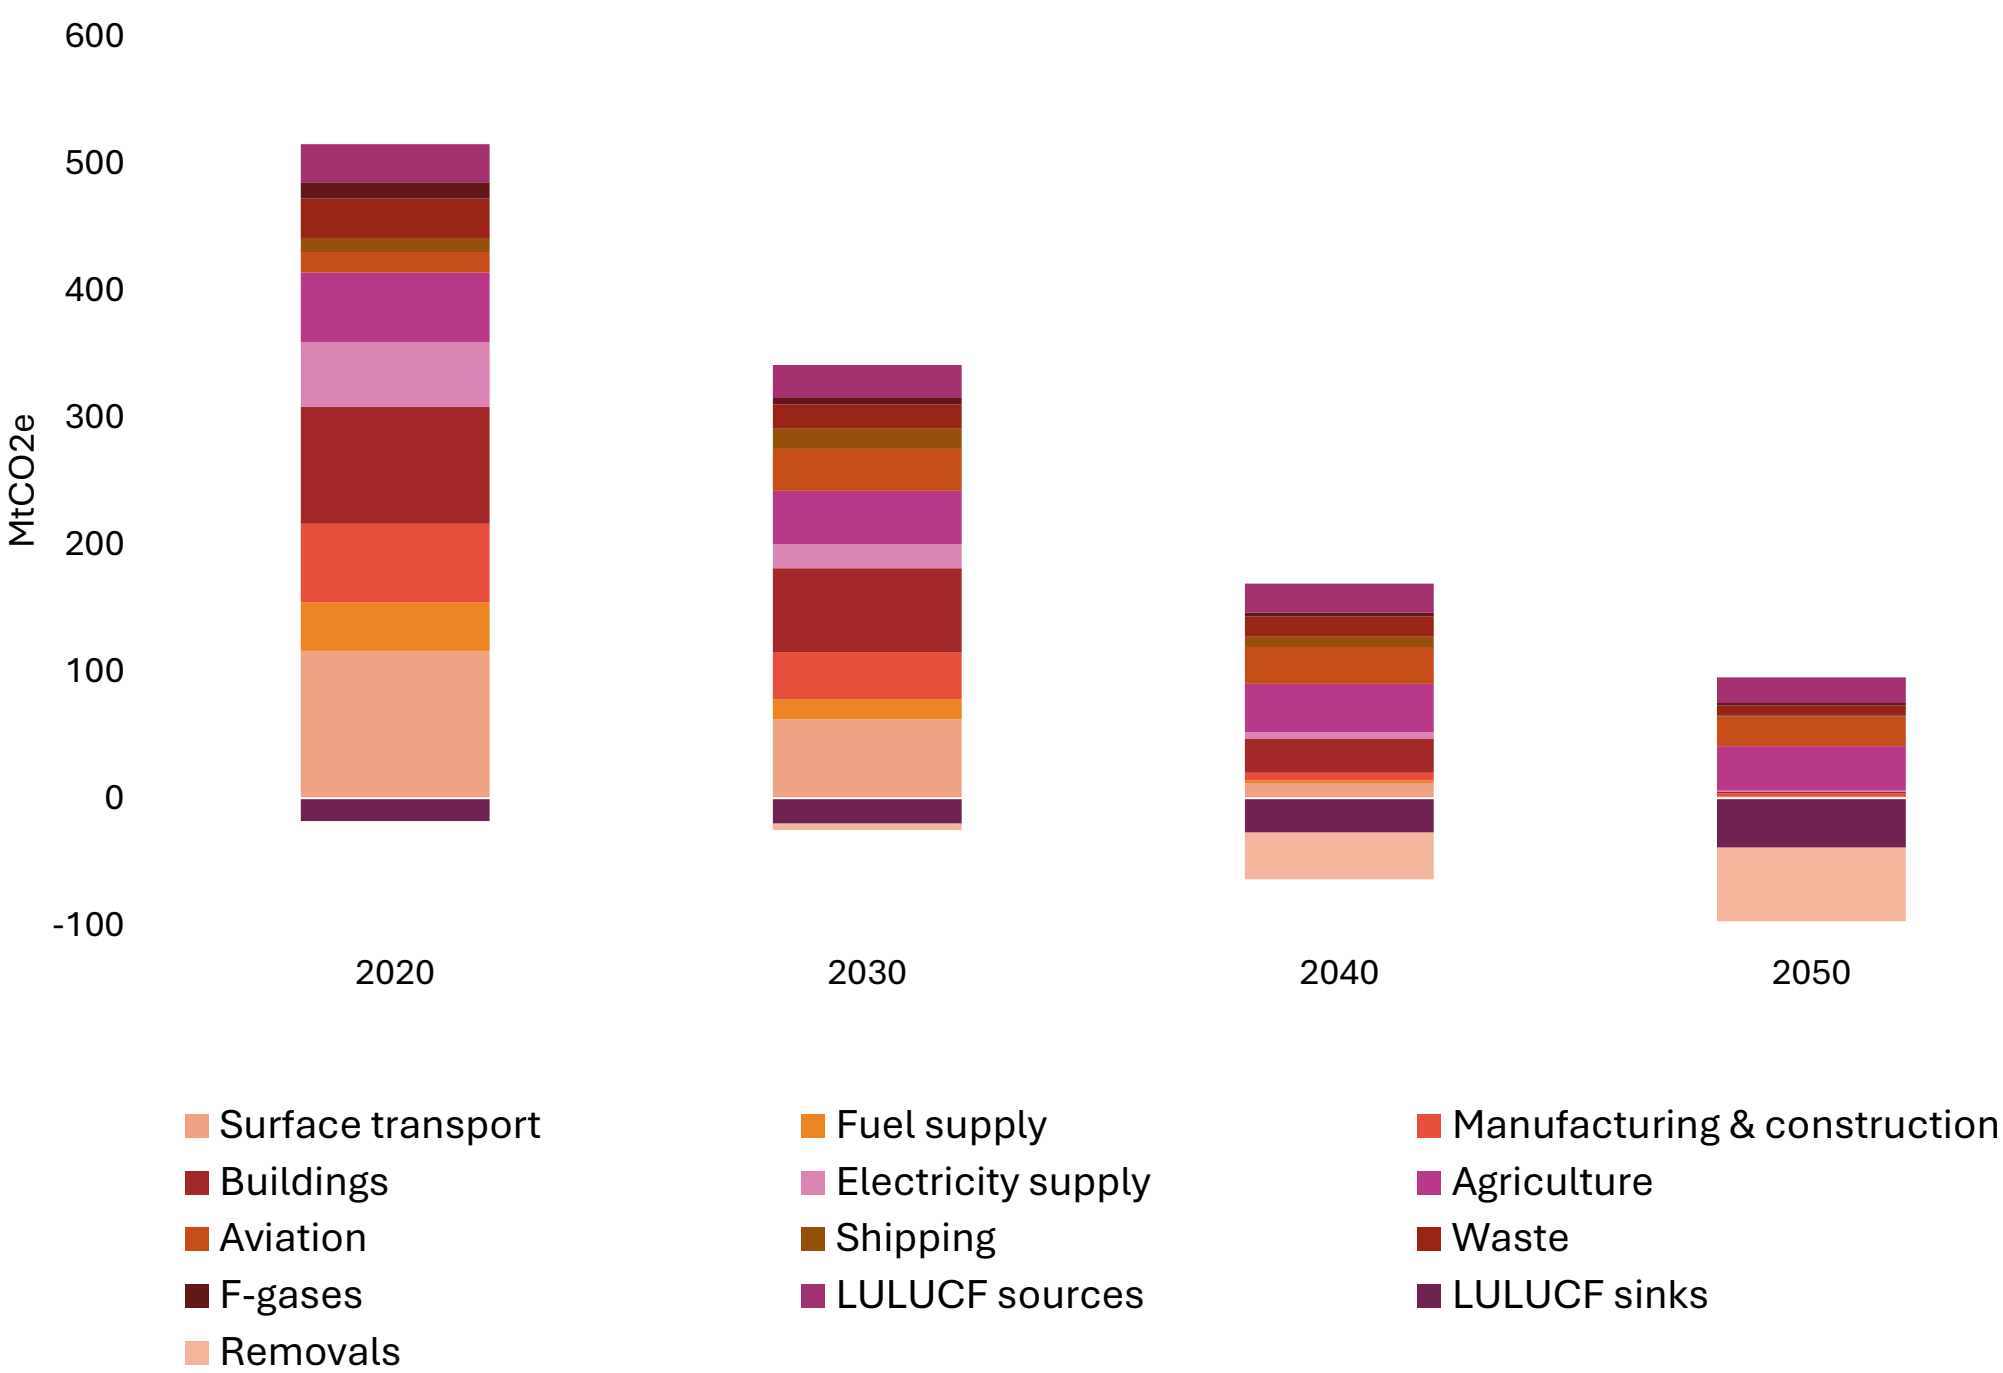

27th November 2024

Carbon pathways: Methodology

- UK food system is **inextricably linked to the climate crisis**
- **Deep emissions cuts** will be required to meet climate objectives

UK Legislated Carbon Budgets

Key findings

- 1 Achieving net zero targets will be a **stretch**, but it is **possible**
- 2 **Major transformation** is needed in all aspects of the supply chain
- 3 Common footprinting **methodologies**, more **reliable data** and **integrated systems** are required
- 4 **Innovation** is a key driver for emissions reductions

Programmes

OVERVIEW: Key demand findings, costings, asks of government and industry

A Net Zero Transition Plan for the UK Food System

David Kennedy, Partner: Corporate Sustainability, EY

27th November 2024

Key findings

- 5 **Demand-side change** will be key to meeting targets
- 6 **Government** action required to strengthen **policy and incentives** across the system
- 7 **Industry collectively** can **accelerate progress**
- 8 Initial cost analysis indicates **significant costs to 2030 and further costs to 2050**
